- Do you smoke?
- No, I don't.

Walking is underrated as a form of exercise, but it's one of the essential ways to get more activity into your day, lose weight and become healthier. Research shows that people who fit moderate activity, such as walking, into their daily life burn more energy than those who make weekly visits to the gym.

Try to fit walking into your routine by ditching the car for short journeys, walking all or part of your journey to work, getting off the bus or train one stop early and planning longer walks at weekends. To reap the health benefits, aim to walk 10,000 steps a day. This can burn up to 400 calories. To keep track of your walking, use a pedometer.

Now listen to the broadcast again.

Angelina Jolie’s surgery to ‘reduce breast cancer risk’

Writing in the New York Times, actress Angelina Jolie has announced that she has recently undergone a double mastectomy (where both breasts are surgically removed) followed by breast reconstruction surgery.

She writes that this is because genetic testing revealed she had an 87% chance of developing breast cancer in later life, as well as a 50% risk of ovarian cancer. This means she took a decision to have ‘preventative surgery’.

Jolie explained: "I decided to be proactive and to minimize the risk as much I could. I made a decision to have a preventive double mastectomy.

"Cancer is still a word that strikes fear into people’s hearts, making you feel powerless. But today it is possible to find out through blood testing whether you are highly susceptible to breast and ovarian cancer, and then take action."

Pause for five seconds after the first reading

Now listen to the broadcast again.
